

Welcome!

Your health and safety is very important to us.

Your care team is....

Checking our temperature and symptoms.

Using personal protective equipment like gloves and masks.

Cleaning and disinfecting the health center more.

We need your help during your visit, too!

Have your temperature and symptoms checked when you arrive.

Wear a face covering.

Wash your hands often with soap and water.

Use the hand sanitizer at the health center.

Do not bring other visitors or guests with you unless you have permission.

Be safe and practice **SOCIAL DISTANCING** in waiting rooms and public areas. Thank you!
